The graph illustrates the average response time of a system under increasing user load. The x-axis represents the 'Number of Users' from 0 to 550, and the y-axis represents the 'Average Response Time (seconds)' from 0 to 70. Multiple data series are plotted, each represented by a different colored line with markers. Most series show a relatively stable or slightly increasing response time as the number of users increases. However, two series exhibit significant spikes. One series, represented by a yellow line with diamond markers, shows a sharp increase starting around 250 users, peaking at approximately 72 seconds at 300 users, and then decreasing to about 40 seconds at 550 users. Another series, represented by a brown line with diamond markers, also shows a sharp increase starting around 250 users, peaking at approximately 44 seconds at 300 users, and then decreasing to about 20 seconds at 550 users. Other series show more gradual increases, with some peaking around 350 users and then slightly decreasing or stabilizing.
